

Infection Prevention Solution
 Visitor Thermal Screening System
InfectionCMS

New Features

| Version | Update Information |
|---------|--|
| 1.1.0.5 | 1. It solved a bug, that is, in the event investigation page, sometimes it can't show the photo registered when a person is recognized. Because there exists a code error to let the picture downloaded cannot be |
| 1.1.0.3 | 1. It solved a bug, which will happen when you register a stanger to blacklist and then remove it from blacklist and then register it to blacklist again. 2. Modify some strings in the Settings module, change the 'VIP management' and 'reset password' to 'Personnel Info' and 'Change Password'. 3. In the 'Personnel Info' page, new add a refresh button to let the result can be updated easily. 4. In the 'Event Investigation' page, can export the data to .csv format. So that you don't need pre-install Microsoft excel . but there are not pictures in the csv files. |
| 1.1.0.2 | 1. When the file user.config was broken, InfectionCMS will auto-restore, but sometimes need back to default user info. 2. Can register visitor's photo on the new-added page 'VIP Management'. 3. On Event Investigation page, insert the photo captured and registered in the table. 4. Add a new alarm type, NG Photo, which indicates the photo captured is not fit for recognition. 5. Adjust the position of indicator 'VFR Disconnect' on the thermal screening page. 6. On the thermal screening page, when the number of alarm events reach to 10000, it will auto delete the oldest one. 7. If abnormal temperature is detected after double-confirm, it will be registered to Black list into FCS, but it will back to normal when the black list is relieved. |
